## Specification for Project 1, Responsive Website

You will build a four-page responsive website that consists of 4 HTML files and 1 CSS file.

The homepage for project 01 is index.html

```
1   <!doctype html>
2 ▼ <html>
3 ▼    <head>
4          <title>Project 1</title>
5          <link href="main.css" rel="stylesheet" type="text/css">
6       </head>
7 ▼    <body>
8
9 ▼        <div class="wrapper">
10
11 ►            <header> ··· </header>
15
16 ►            <div class="menu"> ··· </div>
24
25 ►            <div class="hero_content"> ··· </div>
29
30 ►            <div class="hero_image"> ··· </div>
33
34 ►            <div class="content"> ··· </div>
49
50 ►            <div class="sidebar"> ··· </div>
55
56 ►            <footer> ··· </footer>
59
60          </div>
61
62       </body>
63   </html>
64
```

This image provides you with all of the elements and class names you will use to create the layout for the index.html.

External Style Sheet requirements, main.css

```
  1    @charset "UTF-8";
  2
  3    /* index */
  4  ▶ body { ··· }
 11  ▶ .wrapper { ··· }
 16  ▶ header { ··· }
 22  ▶ .menu { ··· }
 26  ▶ .hero_content { ··· }
 33  ▶ .hero_image { ··· }
 44  ▶ .content { ··· }
 49  ▶ .content img { ··· }
 53  ▶ .sidebar { ··· }
 58  ▶ .sidebar img { ··· }
 61  ▶ footer { ··· }
 70  ▶ footer a { ··· }
 73
 74    /* navigation */
 75  ▶ .menu ul { ··· }
 82  ▶ .menu li { ··· }
 88  ▶ .menu li a{ ··· }
 93  ▶ .menu li:hover { ··· }
 96  ▶ .menu .active { ··· }
 99
100    /* type styles */
101  ▶ h1 { ··· }
108  ▶ h2 { ··· }
114  ▶ h3 { ··· }
122  ▶ h4 { ··· }
125  ▶ p { ··· }
128
129    /* interior bar */
130  ▶ .bar { ··· }
140
141    /* about */
142  ▶ .content_about { ··· }
147  ▶ .content_about img { ··· }
150
151    /* adopt */
152  ▶ .content_adopt { ··· }
160  ▶ .adopt img { ··· }
165
166    /* contact */
167  ▶ .content_contact { ··· }
173
```

You will only have one css file for project 01 and it will be named, main.css

Use notes to outline the CSS properties specific to each page, view the example to the left and this is also available to you in the folder you downloaded.

You do not need any more than the styles on the left to create the layouts for the entire website.

Specify the font-family in the body element

font-family: "Gill Sans" and font-size: 14pt

Refer to the file, grid_columns.png, to help you think through the placement of the columns and grids for this layout.

- Title
  - ARTD 218 Project 1
  - Link to main.css
- Header
  - Use h1 for the name, Pet Rescue Alliance
- Menu
  - Home (index.html), About (about.html), Adopt (adopt.html), Contact (contact.html)
  - Hover state, background color, #31bece
  - Active state, #31bece
  - Font color, #fff
- Hero Content
  - **WOULD YOU LIKE TO FOSTER A DOG? (use h3 tag, color #ffcb31)**
  - Foster parents and families form the backbone of the work we do. We can only exist as a rescue if people continue to be willing to bring needy animals into their homes while we search for permanent homes.
- Hero Image
  - hero.jpg
  - Make sure to use the styles
    - background-image:
    - background-repeat:
    - background-size:
    - background-position:
- Content
  - Where do we find our dogs?
  - Pet adoption usually refers to the process of taking guardianship of and responsibility for a pet that a previous owner has abandoned or released to a shelter or rescue organization. Common sources for adoptable pets are:
    - Animal shelters, in the case of dogs also known as dog pound.
    - Pets found loose or stray without identification, and which are unclaimed by any owner.
    - Advertisements placed by individuals trying to find a new home for their pet.
    - Pets that have been abused or neglected and have been confiscated from the offending owner.
    - Dogs adopted from shelters are often referred to as shelter dogs or pound puppies; dogs adopted from rescue organizations are often called rescued dogs or rescue dogs.

We strive to provide the best care for the animals in our program, and we include MORE in our adoption fees than many small, no-kill rescues. When considering adoption, please check into what is included in the adoption fees. We hold all animals in our care for a minimum of 21 days to properly screen for health conditions, and to provide as much pre-adoption care as possible.

- o Image, banner.jpg
- Sidebar
  - o buddy.jpg
  - o "Any glimpse into the life of an animal quickens our own and makes it so much the larger and better in every way." ~ John Muir
  - o (use h2 tag, color #31bece, font-family "Palatino Linotype")
  - o Make sure to use the double quote character number for your coding.
- Footer
  - o ARTD 218 Week 06 Project / Course Library (this needs to link to your course library)
  - o Background color #31bece
  - o The link to course library needs an underline

About Specifications (about.html):
- Header
  - Same as on each page
- Menu
  - Change class active to About
- Bar
  - The next space needs to have the image, interior_header.jpg and the name of the page.
- Content

Our Story (Use the <h4> header to style this)
<image gallery 04.jpg> 100% width of the area
Animal shelters care for animals needing protection, attempt to find homes for homeless animals, and reunite lost pets with their owners. When necessary, animal shelters give homeless or unadoptable animals a humane death. Today's shelters range from single rooms with multiple cages to state-of-the-art facilities with amenities that may rival some hotels. The "luxury" features, like ambient music and waterfalls, serve to reduce the animals' stress and to make the shelter more inviting, which increases the chances that the animals at the shelter will find a new home.

Animal shelters can be structured in three ways. First, as municipal animal control agencies, run by city or county governments; second, as non-profit agencies overseen by a board of directors; or third, as private, non-profit agencies with a government contract to provide animal control services.

Private, non-profit organizations rely on donations and grants to fund their programs. Many private agencies are limited-access, sometimes called "no-kill" facilities, because they do not euthanize animals to make room for more animals. At times, they find it necessary to turn animals that are brought to them away if they do not have available space. To solve this problem, municipal and private agencies set up foster-care networks to increase the number of animals they can serve at a given point in time.

Shelters, both municipal and private, may provide other services to the public if they have sufficient resources. These services may include animal health services, such as exams and spay/neuter surgeries, behavioral evaluations and training, humane education, and others.

Any shelter can use the term "Humane Society" or "SPCA" in their name. SPCA stands for Society for the Prevention of Cruelty to Animals. These are generic terms that do not imply the

shelter is part of a larger organization or has special powers. In fact, most humane societies and SPCA's are independent agencies. National organizations do not have any oversight or governing power over these independent agencies; however, national organizations offer suggested guidelines and recommendations for animal shelters, which are often followed (Fekety 1998).

Link to content. (The link to content needs to open in a new window and should go to the link, https://faa.illinois.edu/)

- Sidebar
  - "Until one has loved an animal, a part of one's soul remains unawakened." ~ Anatole France
  - Make sure to use the Unicode # for the quotation marks
- Footer
  - Same on every page

Adopt Specifications (adopt.html):
- Header
  - Same as on each page
- Menu
  - Change the class active to Adopt
- Bar
  - The only change is the name of the page.
- The content div structure needs to be: content_adopt
  - Responsive Gallery consists of nine images of cats and dogs
  - The images need the class adopt
- Sidebar
  - Use the h3 element
  - Call the center if you are interested in adopting any of these amazing animals.
- Footer
  - Same on every page

Contact Specifications (contact.html):
- Header
  - Same as on each page
- Menu
  - Change the class active to Adopt
- Bar
  - The only change is the name of the page.
- Content
  - You need to embed a map for the University of Illinois

- o   Make sure to change the width to 100% and the height to 550px
- Sidebar
  - o   **Name of Contact Person,** 000 Main Street, Everytown, Illinois 000000
    Email: leader@petrescuealliance.org (create a link to email)
- Footer
  - o   Same on every page
